

ABS DESIGN- CAST NYLON SHEAVES

Does Your Project Call for ABS Certified Sheaves?

Don't waste your time designing sheaves!

Let us design your sheaves and deliver them to you for less time and money.

- **Receive our Design Proposal in 24 Hours or Less**

Our Certificate of Design Assessment from ABS for Nylon Lifting Sheaves means you can have a design proposal for an approved design in less than 24 hours - plus a firm schedule for manufacturing and final ABS approval, including ABS witnessed load tests.

Every year we design and deliver thousands of wire rope sheaves for a multitude of applications. This experience benefits you because we have automated the design process.

All we need is the wire rope size and construction, maximum line tension, degree of wrap on the sheave and line speed. We'll take it from there.

Our Certificate of Design Assessment eliminates the time and expense of an ABS design review.

- **4 to 6 Week Manufacturing & Certification Proposal**

Once you accept our Design Proposal we will deliver a fixed price Manufacturing and Certification Proposal for delivering sheaves with all the following documentation:

1. Design Prints
2. Material Certifications
3. 100% Final Dimensional Report
4. ABS Certification & Serial Number engraved on every sheave
5. ABS Type Approval Plate on every sheave
6. Final ABS Issued Certification

- **You Focus on High Value Engineering**

Make us your go to guys for all your marine sheave requirements, particularly ABS Certified Nylon Sheaves. We do sheaves all day long - across the universe of sheaves for all applications. Use this experience to your advantage.

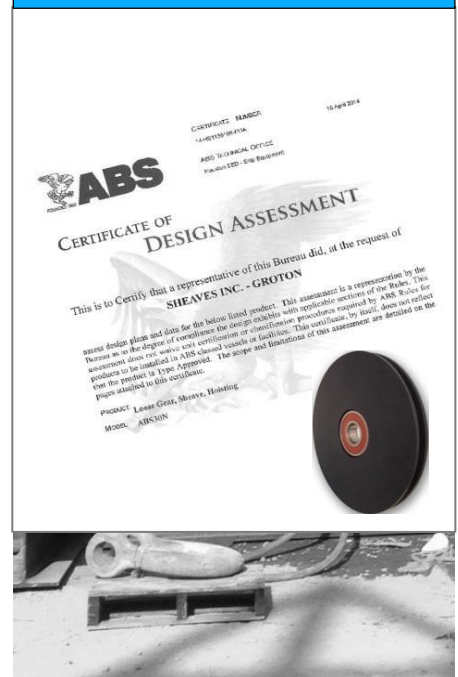

ABS APPROVED DESIGNS

Make life easier for your engineers
